

Dear Valued PayGo Client,

We're reaching out with a quick update regarding your PayGo license for the 2025 Tax Year.

Your PayGo license fee has remained the same for the 2025 Tax Year and continues to include the same number of returns as last year. There is no change to your overall license investment.

For the upcoming season, there has been a small adjustment to the credit cost per return:

- Individual returns are now **34 credits**
- Business returns are now **54 credits**
- E-filing for either return remains **1 credit**

To accommodate this updated credit structure, you'll notice that your account begins the season with a **larger number of credits** than last year. This adjustment helps ensure continuity and flexibility as you prepare returns throughout the season.

As a PayGo client, you have access to e-file for the **current tax year**, as well as the **2023 and 2024 Tax Years**. Any returns completed for the **2023 Tax Year** will be billed monthly, with credits deducted manually by our team, from your PayGo Portal. Returns created for the **2024 and 2025 Tax Years** will automatically deduct credits from your PayGo Portal as they are completed – whether printed or e-filed. If you need access to software for any tax year prior to 2023, our support team can assist by providing the appropriate download links after a **\$50 flat fee** is applied.

Our goal is to keep everything clear, consistent, and easy to manage so you can focus on serving your clients with confidence. This updated information has been updated in the License Agreement for the new season. If you have any questions about your PayGo credits or need assistance reviewing your account, our team is always happy to help.

We appreciate your continued trust in Taxware Systems and look forward to supporting you throughout the 2025 tax season.

Warm regards,
Your Taxware Team
