PRESIDENTS CORNER

I hope you had a great tax season. I was excited to work with the new features that were added this past season and I hope that you were able to use and take advantage of them. I think the enhancements video was a great education tool to see some of those.

We are proud of our Windows software. We are confident that there are no faster or more user friendly Windows tax programs available anywhere at any price. Our support calls, faxes, etc. were significantly fewer than in years past. Many letters and comments have been received indicating how smoothly the programs functioned this past season.

We are looking forward to the new year and being able to work with you for years to come.

ARCHIVE CD

With this newsletter we have included the tax year 2009 archive CD. **If you are current with your updates you DO NOT need to install anything from this disk.** We provide this disk at the end of each tax season for archive purposes. This is nice to have if you are getting a new computer, or in the event of a computer hard drive failure.

The archive CD is getting close to being full so this will probably be the last year we include the DOS tax year 1991-1999 programs.

UPCOMING TAX SEMINARS

We look forward to seeing our customers at various seminars and trade shows. Some of the dates haven't been finalized but here is a partial list of the upcoming seminars that we will be attending. Be sure to stop by and say hello.

- Reno CSTC - June 6-9
- NATP Austin - July 19-22
- Orlando IRS - July 27-29
- Las Vegas IRS - August 24-29
- San Diego IRS - August 31-September 2

WEBINARS AND TRAINING VIDEOS

We are holding monthly webinars. These are primarily to help new clients and prospective clients get used to the programs. It also shows how to use some of the office management tools and other functions built into Wintax. If you would like to attend a webinar send us an e-mail with the month you would like to attend. We will get back to you as soon as the date is finalized for that month.

In addition to the webinars, we have developed training videos. They are available on our website in the Videos section. These include videos for Wintax, E-file, entity e-file, depreciation, TWOfficeManager, and past enhancements. We will be adding a video for the new TWPDFDocArk soon.
