To Taxware Customers

Our last newsletter talked about our progress to date and was included with the Proforma program release. We are still ahead of schedule for the tax and payroll program updates for 2005/2006.

An updated version of the Proforma program is available on the website. The update corrects input numbers on some forms as a result of late IRS changes. If interested, please see the 1040 Message Board for details.

Federal E-file participants must have Internet access as the IRS has indicated they will no longer accept data transmission via dial-up modem. States, such as California, that do not piggy back the federal will still use a dial-up modem. The software will make the appropriate adjustments between the two. Federal efilers who will use a computer with Windows 95, 98 or ME should see the included notice.

Enclosed is a flyer on our new Paperless PDF scanning program. There has been tremendous interest in this since it was announced.

Our Annual Tax and E-file seminar will take place at the Ontario Airport Hilton hotel on January 9 & 10, 2006. The first day will be devoted to program use, changes in tax law, etc. and will start at 9:00 a.m. and finish after 4. Lunch will be provided. The second day will feature E-file procedures and requirements and will last until noon.

We charge only enough to cover the direct costs. The hotel has raised its fees slightly. Therefore the full day seminar will be \$65 per person and the half day will be \$30 or \$95 for both.

Certificates of attendance will be given to those attending. We do not submit the course syllabus for approval. However, they have been accepted by most licensing institutions as meeting continuing education requirements.

Please call, fax, or e-mail us with your reservation. We do need to have an accurate count at least a week before the seminars commence.
